Capture: Same as movement, can jump

Bishop &W — 3 points

Movement: Diagonally, any distance

Capture: Same as movement

Rook &V — 5 points

Movement: Horizontally/vertically, any distance

Capture: Same as movement

Queen &U — 9 points

Movement: Any direction, any distance

Capture: Same as movement

King &T — " points

Movement: 1 square, any direction

Capture: Same as movement

Special Moves

Castling

- King moves 2 squares toward Rook, Rook jumps over King
- Kingside (O-O) or Queenside (O-O-O)
- Neither piece moved before, no pieces between, not in/through/into check

En Passant

- Pawn advances 2 squares, lands beside enemy pawn
- Enemy can capture "in passing" on the next move only

Promotion

- Pawn reaches last rank !' becomes Queen, Rook, Bishop, or Knight
- Usually promote to Queen (called "queening")

Quick Reference: Relative Values

Use these guidelines for trading pieces:

- Bishop "H" Knight (3 points each)
- Rook = Bishop/Knight + 2 Pawns (approximately)
- Queen = 2 Rooks - 1 Pawn (approximately)
- Two Bishops > Two Knights (in open positions)
- Rook + Bishop > Rook + Knight (usually)
- Never trade a Rook for a minor piece without compensation

Ø=Üj TIP: Piece values are guidelines, not rules. A well-placed Knight can be worth more than a bad Bishop. Always consider the position!
