How to Use This Book

This training pack contains 500 tactical puzzles organized by theme and difficulty. For each puzzle, find the best move (or sequence of moves) for the side to play.

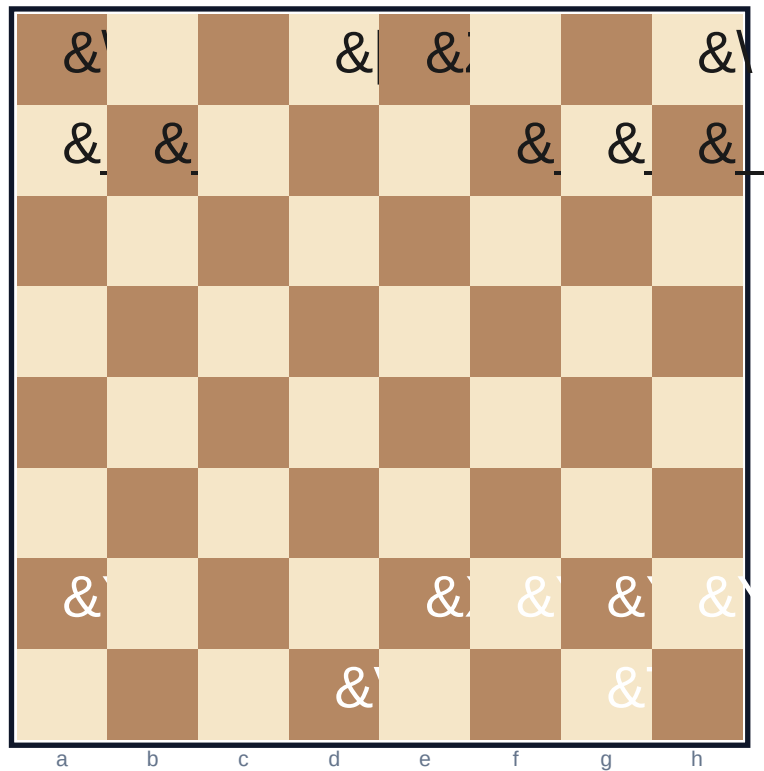

- Start with the theme you want to practice
- Cover the solution and try to solve each puzzle
- Give yourself 2-5 minutes per puzzle
- Check the solution and understand WHY it works
- Track your score: 1 point for puzzles solved correctly on first try

Section 1: Forks (Puzzles 1-100)

A fork is when one piece attacks two or more enemy pieces simultaneously. The attacker wins material because the defender can only save one piece.

Puzzle 1: Knight Fork (Easy)

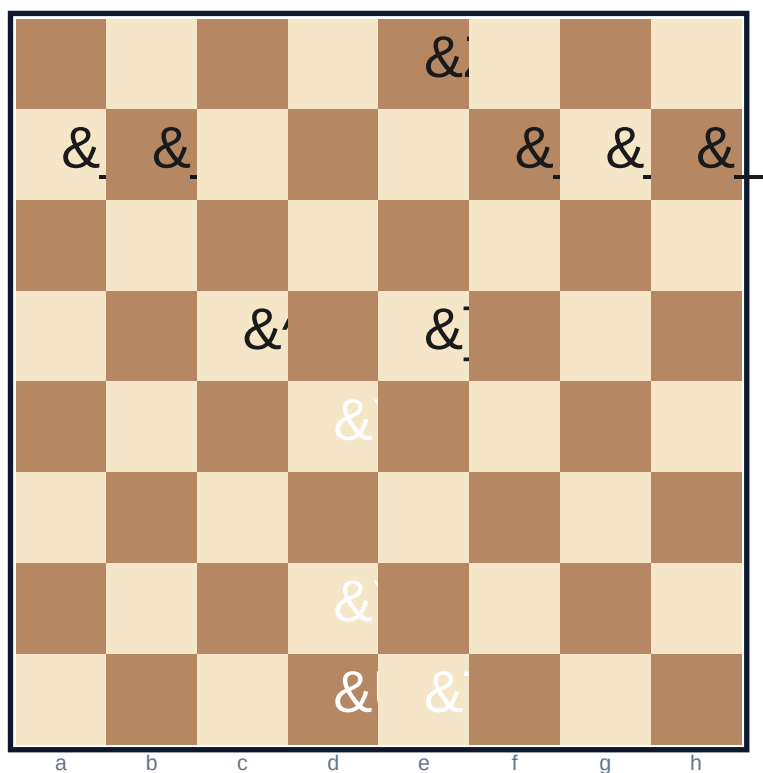

White to move and win material

Solution: Nc3! The Knight attacks both the Queen on d8 (via a future Nd5) — wait, even better: Nf4! threatening Nd5 fork, or simply Nc3-d5. The key idea is getting the Knight to a square where it forks the King and Queen.

Puzzle 2: Pawn Fork (Easy)

White to move

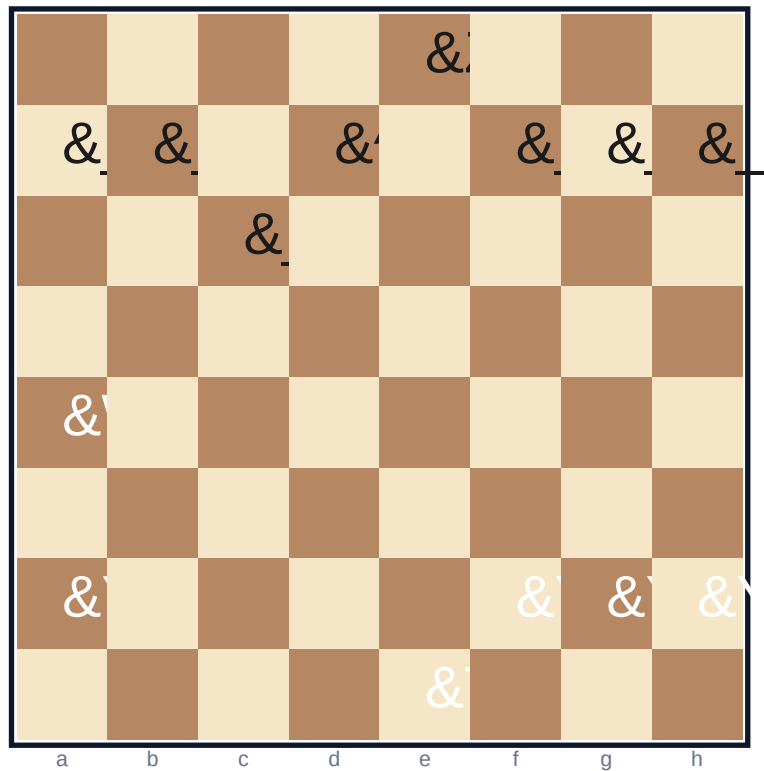

Solution: d5! The pawn advances and attacks both the Knight on c5 and the Bishop on e5 simultaneously.

Section 2: Pins (Puzzles 101-200)

A pin restricts a piece from moving because doing so would expose a more valuable piece behind it.

Puzzle 101: Bishop Pin (Easy)

White to move and win material

Solution: The Bishop on a4 pins the Knight on d7 to the King on e8. The Knight cannot move! White can pile up on the pinned piece with moves like c4-c5, or simply win the Knight.

Section 3: Skewers (Puzzles 201-250)

A skewer is the reverse of a pin — a more valuable piece is attacked first, and when it moves, a less valuable piece behind it is captured.

Section 4: Discovered Attacks (Puzzles 251-350)

A discovered attack occurs when one piece moves to reveal an attack from the piece behind it.

Section 5: Double Checks (Puzzles 351-400)

Double check is when two pieces give check simultaneously. The only defense is to move the King.

Section 6: Combinations (Puzzles 401-500)

Combinations involve multiple tactical ideas working together. These are the most challenging puzzles.

Scoring Guide

450-500 correct: Excellent! You have strong tactical vision.

350-449 correct: Great work! Keep practicing to sharpen further.

250-349 correct: Good foundation. Focus on pattern recognition.

150-249 correct: Keep going! Daily practice will improve your score.

Below 150: Don't worry — everyone starts somewhere. Review the solutions and try again!

Ø=Üj TIP: Tactics are the most important skill to develop as a beginner. Solve puzzles every day on lichess.org/training (free!) to rapidly improve your pattern recognition.
